

MEADOW VIEW

THE STONE PROFESSIONAL

Growth through ideas and inspiration

MULTIPLE PRODUCTION SITES

EXTENSIVE STOCK HOLDING

We have three production sites with four further dockside storage facilities to provide extensive stock holding. Pictured below is our most recent acquisition at Rye, East Sussex.

RYE

- ✓ 24 acre freehold production site
- ✓ Dockside storage & unloading
- ✓ 100,000 tonnes of product storage
- ✓ Multiple shipments provide key logistical savings

ALL SITES

- ✓ Extensive stock holding capacity
- ✓ Unsurpassed washing, processing and bagging facilities

Southern Depot

THE SITES

Meadow View are owned by one of the largest independent decorative aggregate companies in the UK, who are currently the only UK supplier who bulk ships products into dockside storage facilities, at four locations which hold in excess of 100,000 tonnes of raw material.

THE SHIPMENTS

This not only means that we are fully in control of our own supply chain, rather than through intermediaries, but also that far greater volumes of stock are held at these strategic sites to react quickly and dynamically to demand. These sites also store a selection of UK sourced products to give assured stock holding of key products and offer strong logistical savings.

THE STOCK

Furthermore, we have the ability to instantaneously increase the volume of shipments of our raw material supply, particularly with our overseas partners to react quickly to any increases in demand.

THE PRODUCTS

With extensive washing and processing facilities our products are supplied cleaner and more accurately sized than all competitors.

Their ability to step up and provide us with an admirable level of support during the tough times that COVID has brought us is a testament to their efficiency and dedication, not only as a business, but as a team

Karl Curson, Taverham Nursery

SLATE COLLECTION

Slate Collection

Each year we supply over 50,000 tonnes of premium Welsh Slate into the UK decorative aggregate sector.

These core commodity products provide some of the **best selling lines** in Garden Centres, with Plum Slate 40mm still being the single best selling product.

TOP TIP!

All of our Slate products are sourced from premium Welsh Slate

WHAT ARE OUR RECYCLED AGGREGATES MADE FROM?

TERRACOTTA 5-14mm

A product derived from reject clay roofing tiles, classified as seconds or identified as inferior for sale. These rejects would otherwise be lost to landfill.

SILVER ICE 20mm

A surplus product produced in the extraction process of China Clay. It is identified as a bi-product which would otherwise be lost to landfill.
